Ready for Managed Document Services and Fleet Support

If you're looking for a device that extends the benefits of managed document services down to the desktop, then look no further. Managing imageRUNNER LBP printers and MFP devices is easy with imageWARE Enterprise Management Console software. Administrators can remotely monitor the status of an entire fleet of MFPs and printers across the network to help maintain uptime for users. The Color imageRUNNER LBP5280 model has been designed to fully integrate with imageWARE Remote, allowing your Canon Authorized Dealer to proactively and securely monitor usage, relay status, and even remotely update firmware, saving your business valuable time and resources.

Uncomplicated operation

Users will appreciate the clarity of the 5-line LCD display and intuitive control panel of the Color imageRUNNER LBP5280 model. The distinctive panel features on-screen navigation to facilitate device setup as well as animations to help guide operations. Replacing the all-in-one toner and drum cartridge is also simple—just tug the handle to open the front access panel. Reloading paper is easier, too, with an auto-sensing tray.* Easily print PDF, JPEG, TIFF, or XPS files without a computer via the standard front-mount USB port. And enjoy secure follow-me print release from Canon's powerful uniFLOW solution via an embedded MEAP integration—no release station required. A unique integration with imageRUNNER ADVANCE MFP devices lets you route in-bound faxes to your Color imageRUNNER LBP5280 printer, saving time and reducing fax lines.

Compact desktop performance

The Color imageRUNNER LBP5280 printer is the ideal choice for small corporate workgroups and small offices needing a color desktop print solution. Leveraging Canon's patented RAPID Fusing System and revolutionary short vertical paper path, this model produces vibrant color and monochrome documents at up to 21 ppm (LTR), while also automatically duplexing to save paper. Its compact size saves space, and its low energy consumption—just 1W in Deep Sleep Mode—saves electrical costs. The optional paper cassette allows for up to 550 total sheets for longer runs of multiple paper types. Canon's innovative paper-level sensor proactively prevents problems by detecting when the output tray is full, and then automatically resumes printing when the tray is emptied.

Flexible printing options

Support for UFR II, PCL5c/6, and Adobe PostScript 3 is standard on the color imageRUNNER LBP5280 model, giving you the flexibility to choose how to produce your documents. UFR II is optimized to produce high-speed output by automatically sharing processing tasks between the desktop computer and the printer. Adobe PostScript 3 support delivers true rasterization of PS3 print data, particularly useful for design, publishing, education, and healthcare businesses. Canon's print driver architecture and intuitive layout are highly consistent for all driver types throughout the entire imageRUNNER and imageRUNNER ADVANCE line, simplifying use and ensuring a familiar user experience across different Canon systems. The Color imageRUNNER LBP5280 model is ready for business with support for multiple platforms including Citrix and SAP. The available Barcode Print Kit supports a wide variety of bar codes, while the optional SD Card adds support for Encrypted Secured Print and onboard document storage.

* Available on the optional Paper Feeder PF-45 cassette.
