The OKI® MPS3537mc+/MPS4242mc+ Series Color MFPs combine high-quality color and four-in-one functionality with speed, reliability and ease of use—superior value from MFPs that have a footprint small enough to fit easily into your environment.

They're the perfect solution for the mid-size workgroups in your company.

Enhance the productivity of your staff – These MFPs are fast: the MPS3537mc+ and MPS3537mc+ Wireless print and copy at up to 35 ppm in color and 37 ppm in black & white; MPS4242mc+ Series models print and copy at up to 42 ppm in color and black & white. And the first color page prints as fast as 9 seconds.¹

They all have a duplexing/reversing automatic document feeder (RADF) that quickly scans both sides of a document. And, with their robust duty cycle and paper tray options, these durable devices can be relied upon to handle large daily print and copy volumes.

Scan at the machine or from your desk – Turn hard-copy documents into electronic files with multiple options. Scan documents in color or black & white, and send them to your PC, a network folder, a USB stick, or to a list of e-mail addresses. Save them in PDF/A-1b format for reliable long-term reproduction.

You can also remotely preview and scan your documents on your PC via the network connection. Insert a USB memory stick into the convenient front port to save scanned documents to or print files directly from the USB stick.

The convenience of E-Filing – Store your digital documents on or transfer them from “boxes” on the secure hard disk drive. Users have walk-up-and-print or pull-down (to their PCs) access to all documents in the public box, or access via password to documents in private boxes. Passwords can be assigned to specific users or shared within a department.

Full-featured fax – All models have a powerful Super G3 fax with Dual Access, T.37 Internet faxing, a 3,000-entry address book, double-sided fax scanning, and the ability to let you send faxes directly from your PC.

They can make your job easier – The MPS3537mc+ and MPS4242mc+ Series are user friendly: network-ready right out of the box, with an intuitive operator panel that's simple to use—9" color touch-screen graphic display, alphanumeric keypad and function buttons. And the MPS3537mc+ Wireless model comes with a Wi-Fi CERTIFIED™ b/g/n wireless LAN standard.

These MFPs put productivity-enhancing solutions at your fingertips—including web-based applications customized to your needs.

OKI understands the many challenges confronting the business world today. That's why we offer a variety of world-class solutions designed to increase business productivity, while reducing your costs. Our custom solutions offer an effective mix of quality, performance, reliability and value to help you optimize your processes by combining our cutting-edge technology, customized service and unrivaled support.

The MPS3537mc+/MPS4242mc+ MFP Series improves productivity with scan solutions like these:

- **ABBYY® Fine Reader 12 Sprint** is a powerful yet simple document capture system that allows you to quickly establish a cost-efficient process of converting paper to searchable and re-usable electronic documents.
- **SENDYS Explorer LITE** streamlines business processes and saves time. This solution will help companies of any size fulfill their document workflow needs, maximizing efficiencies from capture to distribution. It enables the user to convert documents and distribute or upload them to a chosen location, providing greater flexibility to edit, access, print, retrieve and share files. SENDYS Explorer LITE is available for download at no charge, and optional cloud connectors and premium versions are available for purchase.

Monitor and control your printing. OKI Print Job Accounting software allows you to restrict printer access to individuals or groups, and to manage printing within defined cost limits. It provides you the ability to report on usage across the network, capturing information on volume, paper size, media type and consumables usage.

It also enables printer monitoring, letting you create job logs to analyze how a device is being used—by user name, applications used, and number of pages printed or copied. The data can help you determine the effectiveness of your existing policies or to develop new ones.

OKI Smart Extendable Platform – redefining “multifunctional”

The MPS3537mc+/MPS4242mc+ MFP Series can optimize and simplify document processing and workflow. With OKI's flexible MFP architecture, your company, software developers or OKI Solution Partners can create customized solutions to meet your specific business needs. The web interface of MPS3537mc+/MPS4242mc+ MFP devices lets users interact directly with web-based applications via the touch-screen display of the MFP's operator panel.

And, as new applications become valuable and available to your business, they can be added to your MPS3537mc+/MPS4242mc+ MFP device's feature set using embedded OKI Smart Extendable Platform technology.
