¹ When used with finisher-equipped OKI Digital Color printer.

The total office solution for color and mono printing, copying and scanning.

Color gives business documents more impact. So if you have an original color document, it's smart business to distribute copies in color. That is, as long as your color copier is fast, flexible and, most of all, affordable. And that's what you get with the 20 copies-per-minute OKI® C7300/C7500n Color Copy Systems (CCS).

Choose your level of convenience and savings. Instead of running to the copy center every time you need color copies or printouts, take advantage of OKI Single Pass Color™ Digital technology—delivering fast output speed, high resolution, long-lasting consumables and unmatched reliability—and make your copies in-house.

Use your new color copy system to produce up to 99 color copies of an original page at 20 cpm. Or print out full-color documents from files on your PC or the network. Or scan hard-copy documents or artwork and save them as electronic files on your PC. And you can perform any of these steps in a productivity-enhancing short time.

Designed to perform solo or shared.

With the C7300/C7500n CCS, you and your workgroup or departmental colleagues can have local walk-up copying or fast network printing. The OKI C7300 model is a stand-alone unit, networkable via an optional OkiLAN® internal or external print server; the OKI C7500n model comes factory-configured with an OkiLAN 6200e+ 10/100 Base-T Ethernet Internal Print Server, so it's right at home in the most popular shared environments.

Set up your color copy system on its printer stand/cabinet and enjoy terrific performance even when space is limited.

The C7300/C7500n CCS also support OKI Job Accounting software (which comes standard with both models), allowing you to get a precise count of color and mono pages as well as copies versus prints.

For high-quality, permanent color copies, printouts and convenient scanning—at an affordable price—OKI C7300/C7500n Color Copy Systems are your solution.
