

## Compact Auto-Release Clamshell Press

Perfect press for the expanding digital direct-to-garment marketplace

### Insta Design Advantages

**Auto Open** With the use of a strategically placed electromagnet, the upper platen automatically releases at the end of the time cycle, without the use of an air compressor.

**Cast-In Heating Element** The tubular heating element is cast into the aluminum upper platen, heating the metal from within. The element is coiled throughout the upper platen to provide even circulation of heat across the platen.

**Distribution of Pressure** The pressure source is strategically placed over the center of the upper platen and uses struts to drive pressure out to all corners. The result is an even and heavy duty distribution of pressure that is unmatched by other heat presses in the market today.

**Integrated Digital Controller** which features controls for time, temperature (F° or C°) and cycle counter.

### Solid as a Rock Construction

#### Best possible return on your investment

When you step up to an Insta you get a press that will continue to perform, year after year after year.

### Working Space Dimensions

- Depth: 25" (63.5 cm)
- Width: 35.5" (90.17 cm)
- Height: 28.5" (72.39 cm)
- Power: 120 volt - 1750 Watts, 14.6 Amps  
230 volt - 2200 Watts, 9.6 Amps
- Shipping Weight: 131 lbs (59.4 kilos)

### Product Features:

- Made in the USA
- Space saving design
- 15" x 20" platen (38.1 x 50.8 cm)
- Worry free automatic open (no compressor needed!)
- One-piece ergonomic wrap-around handle assembly
- Smooth, quiet auto-open release

### Operator Benefits

**Easy Access** 3° back opening for easy placement and removal of garment.

**Auto Open Release Feature** eliminates risk of scorching.

**A Practical Solution** for use as a pre-and post-curing agent.

**Safety Features** A three second pre-open beep for safety.

**Perfect Press** for the expanding digital direct-to-garment marketplace.
